## Field Trip Report

**Duration; 1 day**

**Date:16/10/2019**

### **Venue: Sir. M. Visvesvaraya Rain Water Harvesting Theme Park.**

A field trip was organised for V semester students to BWSSB and IISc Joint venture, Modular state of the art, Educative cum water informative centre - set up at Jayanagar V block, Bangalore.

A batch of 20 students visited the centre on 16/10/2019, the session started with an Audio-Video presentation about the water conservation and other uses. It portrayed about the water reserves and bangalore water bed.

The Session-2 was an In house Museum of various methods of water utility facility and water conserving methods for practical day to day life. The models on display and interactive structure at the facility was a eye opener for saving water, The theme models were well depicted.

The session -3 started with an outdoor activity, This session explained the various models designed by the scientists which if implemented and used for both Rural and Urban areas for rain water harvesting.

We were accompanied by team leaders of water harvesting mission namely Dr. Gowtham and Abhishek for enhancing and enriching the knowledge of water harvesting. We extended a heartfelt thanks to the team leaders on behalf of the college, department and students of Vijaya Colege.
