No improvement

I don't no

Nothing to be improved all good.

-

I cannot fill those points as she is not teaching for us

--

Study well

Improve your knowledge

Very strict, Not giving ia marks

Teaching is good I don't think so if improvement would have been done here.

Nothing everything is ok

Coordination with students is necessary

Treat every student equally

She don't take classes for us so i dont know about her teaching but as I observed her in lab she is so empathetic and down to earth person I just request her to interact with first and second year students also even though she don't take class

Respect student

Best

--

Should stop encouraging unbothered student . Or at least should assign less work for the same set of students (eg: making write 5tests just because we attend all classes sincerely, 5 or 6 different assignments etc) all these efforts to get same marks as students who has 0 attendance.

She need to improve her way of teaching, I was not able to understand her teaching when she was taking class because her class was so boring, I like her as a person she is so nice teacher she don't easily judge and she patiently listens I really appreciate that but she has to change her way of teaching so that it would be better so students will be interested to listen and can try to understand it was very difficult to understand her teaching it would be better if she try to keep the class interactive and she should be more straight if any student makes wrong in the class other wise I always respect her for her patience 😊

I request her to understand students and to teach lab programs deeply and make students to clearly understand the programs because in these sem she teaches well but I really didn't understand some programs but seriously I was afraid to ask doubts or ask to teach one more time because I never felt that space with any lab teachers they can teach patiently so I request you mam also all teachers to please try understand us and help us to understand the subject patiently 😊 but also thank you mam because many times you have understood us I should not lie but I request all teachers to understand these genre students mindset and teach patiently thats it

Can present even more effectively..

Teaching the lesson in hurry , she teaches in complicating manner , no revision after completing the syllabus.

She is nice person but I just don't like her teaching because her way of presentation is very bad she really need to improve that she has to adapt different way of teaching to attract students but I like her because she is so straight she never hesitate to advice students and when they did mistake but our class mates many times miss understood that because they just hate her because she advices and scold when they did wrong but I really appreciate her for that as a person she is good but she need to change her way of teaching and she need to learn to attract students interaction in class so that it would be easy to make them to concentrate on subject

Actually she is the one person who I hated most in first sem because I just thought that she is so arrogant but now I really feel guilty for that because she is really fantastic teacher why I like her most is for how she understand us she really understands students problem very well and I have seen that she has so much patience and I appreciate how she treat students she never scold very soon without listening them but I don't like her teaching that much because her class was not that much interested she need to keep the class interactive so that we will have interest in class and build concentration in class she can adapt different ways in teaching

No clarity in presentation, lack of practice class, poor in understanding the concepts

Actually she is so down to earth and I think she has many dreams about education which I have seen in her , she always try to keep students more active and always motivate us which I like most she is so knowledgeable and experienced but her teaching needs to be improved I think so because we can't easily understand her teaching it will be boring and not interested but she teaches out of the box topic excellent I always like to gain outer knowledge than text book knowledge so in that manner she is so excellent in teaching knowledge which will be helpful not to gain marks but to learn the subject and understand the current affairs

No clarity in presentation , he will not give any notes and he will not provide any revision after completing the syllabus, he completes the lesson or syllabus very fast He will not bother whether the students might understand or not.

He is most active teacher in cs department I think so but his teaching is not that good he will just go on teaching unnecessary topic rather than subject it is necessary to gain outer knowledge of the subject including textbook knowledge but he will teach unnecessary information which will be waste of time so he need to improve that aspect other wise it would more difficult to students to understand the topic but the thing which need to be appreciated is how he make the class lively I still remember how much I have laughed in his class he tries to gain all students interaction so that it would be easy to make students to concentrate on the

He is so calm teacher I really like that but I request him to become more strict other wise students can misuse his calmness because everytime remaining calm is not good I think but I request that he needs to communicate with students needs whether they are understanding subject or not his teaching style needs to be changed .. but he never scold any students easily he listen to us very calmly so that we can easily interact with him easily..

1. Should be less rude and approachable for regular students. And should stop appreciating irregular students (includes test, assignment, attendance).

2. Should be less biased.

3. Should not give same IA for one who did all and one who didn't even cared to attend

Should not be biased.

Should give IA marks equally to all the students.

Should be polite and acknowledge regular students for their efforts to attend classes instead of counselling irregular students.

Some students are old and mature enough to take care of themselves. It is understandable that as a teacher she'd be concerned about a student not being consistent to classes but she has to let go at some point and let him/her be. It's high time final year students began to act their age and responsibly.

Language improvement

She must listen and understand what the student is trying to ask and give clear explanation also she is never clear with teaching any chapter with clear meaning

Clarity of teaching can be improved as we are not able to understand many things

She's better

Need to improve a little clarity in presentation

Her way of explaining and pronunciation of the words

Good

Everything is good

We need some more explanation about the chapters and everything is fine

1. we can't understand the lesson
2. If we ask questions mam will not say properly
3. Mam will not give notes on time

Takes long time to complete a chapter
